

MANAGEMENT OF NON-STANDARD PRODUCTS – BRAND PROTECTION

We provide value to the industries.

At Hidronor we take charge of the waste management and treatment to look after the environment, the people's health and the industrial development in Chile.

We deliver solutions to the needs associated with the production of non-standard products, in an integral, efficient and safe way. This consists in the disuse of products that are expired, in poor condition or defective, and is known as brand destruction.

Service

MANAGEMENT OF NON-STANDARD PRODUCTS – BRAND PROTECTION

DESCRIPTION

This service allows the deactivation, brand destruction and elimination of non-standard products.

The process consists in a programmed removal of products, which are transferred to a specialized treatment and final disposal center, in securely sealed trucks according to the current standards.

CHARACTERISTICS

- Considers transportation and treatment services for the disuse and final disposal of waste.
- Process selection of the most appropriate brand disablement and destruction according to the characteristics of the product.
- Service targeted towards clients, as: medical laboratories, cosmetic laboratories, international brands, companies in need of product destruction, tax documentation, disused parts and pieces, among others.

BENEFITS

- This activity may be visualized by the client in the presence of a notary, so as to obtain photographs and generate a notarized agreement of the certificate emitted by Hidronor.
- Major security in the elimination of non-standard products to avoid a negative

impact in the environment, as well as, commercialization of informal marketing.

- Allows tax reduction with the SII, of non-commercialized products (validated in the presence of a notary).
