

WE ARE ENGAGED

With caring about the environment and sustainable development of the country, providing comprehensive solutions in revaluation, soil remediation, treatment and final disposal of waste.

COMPREHENSIVE ENVIRONMENTAL SOLUTIONS

according to the needs of each company

Hidronor

Pioneers in Chile with more than 25 years of experience in the waste management industry. We add value to the environment through innovative solutions for revaluation, soil remediation, treatment and final disposal of waste in all sectors of the national economy.

We provide extensive coverage throughout Chile through our treatment and final disposal centres located in the north, centre and south of the country. Additionally, we have a sanitary landfill and a Biogas plant in the Biobío region.

Our services include advice, analysis and characterization of waste through internationally certified laboratories by the Centre of Experts in environmental analysis of Quebec, Canada, and highly qualified personnel to find the best solution for the management of industrial and hazardous waste, contributing with this to the sustainable development of the country, aligned with the regulations of the Rep. Law, to support companies in the correct management of their waste.

We value **+ 8,000 tons of hazardous waste** annually.

We have managed and recovered **+450,000 tons of contaminated soil** in recent years

NATIONAL COVERAGE

Present in all areas of the country

Our services

Transport, treatment and final disposal of waste

- Hazardous and non-hazardous Liquid Industrial Waste (ILW). Chemical physical treatment line.
- Hazardous and non-hazardous Solid Industrial Waste (RISes). Inerting treatment line.
- Security deposit.

Energy revaluation, recovery and recycling of waste

- Revaluation of waste through the production of alternative fuel based on waste with calorific value.

Remediation and sanitation of contaminated land

- Sampling, analysis, removal, authorized transport, treatment, final disposal and/or recovery of contaminated areas.

Development of projects at client sites (On-site services)

- Handling, conditioning and waste management.
- Administration of hazardous waste warehouses.
