

WE ADD VALUE

Through industrial and hazardous waste treatment, revaluation, soil remediation, recycling and on-site services.

COMMITTED
TO SUSTAINABILITY

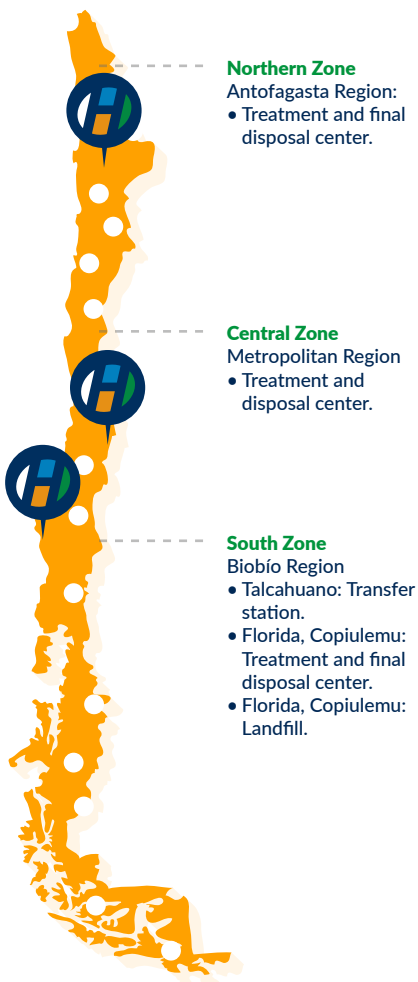

At hidronor we contribute to environmental sustainability and the reduction of climate change

Through our innovative solutions for industrial and hazardous waste treatment, revalorization, soil remediation, recycling and on-site services.

We deliver a wide coverage throughout Chile thanks to our three treatment and final disposal centers located in the northern, central and southern areas of the country, in addition to our landfill and biogas plant in the Biobío region.

Our services include consulting, analysis and characterization of waste through internationally certified laboratories by the Experts Center in environmental analysis from Quebec, Canada, and highly qualified personnel to find the best industrial hazardous waste solution, thus contributing to the sustainable development of the country, aligned with the regulations of the Rep Law to support companies in the proper management of their waste.

Additionally, our subsidiary Greendot is dedicated to recycling waste in order to prepare it for recovery and outsourcing.

**We have managed and recovered
+450,000 tons of contaminated soil**

**We recover more than 12,000
tonnes of hazardous waste annually**

INTEGRATED ENVIRONMENTAL SOLUTIONS THAT CONTRIBUTE TO THE CIRCULAR ECONOMY OF THE COUNTRY

..... **Transport, treatment and disposal of waste**

- Hazardous and non-hazardous liquid industrial wastes (HILW).
- Physical chemical treatment line.
- Hazardous and non-hazardous Industrial Solid Wastes (ISW)
- Inertisation treatment line.
- Safety tank.

..... **Energy revalorization, waste recovery and waste recycling**

- Waste revalorization through the production of Solid and Liquid Alternative Fuel (CAS and CAL) based on waste with calorific value.

..... **Remediation and remediation of contaminated land**

- Sampling, analysis, removal, treatment and/or remediation of contaminated sites.

..... **Project development at client sites (on-site services)**

- Handling, conditioning and waste management.
- Hazardous waste cellar management.
- Cleaning of contaminated yards, cellars, pools and ponds.
- Cleaning of contaminated yards, cellars, pools and ponds.
- Handling and reclamation of mine slag.

..... **Management of non-standard products**

- Destruction and disposal of off-spec, out of date or spoiled products (brand protection).

..... **Export and incineration of waste**

- Management, treatment and disposal of Persistent Organic Pollutants (POPs): Polychlorinated Biphenyls (PCBs), pesticides and halogenated wastes, among others.

..... **Waste assessment, analysis and characterization**

- Environmental waste consultancy.
- Waste analysis and characterization.
- Determination of hazardousness.
- Analysis of heavy metals in RILEs and RISEs.
- Determination of PCBs.
- Analysis of organic compounds.

..... **Storage of hazardous products and waste**

- Warehouses for temporary storage of waste according to DS. 148 authorized by the Health Service:
 - Flammable waste
 - Non-flammable waste - PCBs and POPs
